SUMMARY

Final-year Computer Engineering student and MERN stack developer with a completed full-stack internship and two production-style projects: an AI mock interview platform and a cloud IDE with Git automation. Experienced in REST APIs, JWT authentication, role-based access control, real-time features and LLM integration. Strong foundation in data structures and problem solving.

EDUCATION

Savitribai Phule Pune University (SPPU) <i>Bachelor of Technology in Computer Engineering</i>	2023 – 2027 CGPA: 9.06/10
N.T. Mundada High School, Jalgaon <i>Higher Secondary Certificate (XII), Science</i>	2023 70.80%
Shri N.T. Mundada Global View School, Jalgaon <i>Secondary School Certificate (X)</i>	2021 90.20%

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, C++

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman

Concepts: REST APIs, CRUD Operations, JWT authentication, RBAC, Socket.IO, Responsive Web Design, UI/UX Basics

EXPERIENCE

Full Stack Web Development Intern <i>Innovara Dynamics</i>	June 2026 – September 2026 Pune (Remote)
- Onboarded onto an existing codebase and contributed UI fixes and improvements using React, Git and GitHub. - Designed and built CodeForge, an internship and engineering management platform, from wireframes to a responsive React frontend, dashboards, task-tracking interfaces and backend APIs. - Refactored UI components and carried out internal testing across authentication, project and task management, and GitHub integration modules.	
Frontend Web Development Intern <i>IBM SkillsBuild with Edunet Foundation (AICTE)</i>	August 2025 – September 2025
- Built responsive web pages and reusable UI components using HTML, CSS and JavaScript, with form validation. - Followed clean coding practices and component-based architecture.	

PROJECTS

MockMate: AI Mock Interview Platform <i>React 19, Node.js, Express 5, MongoDB, Google Gemini, MediaPipe</i>	github.com/sai1733/MockMate
- Built a full-stack platform for timed technical and behavioral mock interviews, with a candidate dashboard showing per-skill analytics on a radar chart and an admin CMS managing a 240-question bank across 26 skill tags with Gemini-generated grading rubrics. - Designed asynchronous AI grading: answers return HTTP 202 immediately while Gemini scores them in the background against strict JSON schemas, with exponential backoff retries, cron sweepers for failed gradings and prompt-injection protection. - Moved speech-to-text (Web Speech API) and facial composure tracking (MediaPipe in a Web Worker) into the browser, so the server receives only text and a score, with no audio or video processing. - Implemented dual-token authentication with an in-memory access token, rotating HttpOnly refresh cookie and silent 401 refresh queue, plus RBAC, rate limiting, a server-anchored interview timer and a 19-assertion end-to-end test suite.	
CodeForge: Cloud IDE and Git Automation Platform <i>React 18, Node.js, Express 4, MongoDB, Socket.IO, StackBlitz WebContainers</i>	github.com/sai1733/CodeForge
- Built a collaborative platform for managers and interns with invite-only onboarding, three roles (intern, manager, superadmin), a task lifecycle with review and approval, and daily work reports with manager hour sign-off. - Embedded a browser-based cloud IDE using StackBlitz WebContainers, with a diff-based sync that stores each intern's file system in MongoDB. - Automated the Git workflow through the GitHub REST API: OAuth linking, per-intern branches, commit and push from the browser, and pull request creation and merge, with GitHub tokens stored encrypted using AES-256. - Added real-time notifications over authenticated Socket.IO, an hourly scheduler for due and overdue tasks, JWT authentication with role middleware, and Chart.js dashboards.	

CERTIFICATIONS

- PostgreSQL (82.5%) and Linux System Administration and Shell Scripting (80.0%), IIT Bombay Spoken Tutorial
- C++ Essentials 1 and 2, C++ Advanced; JavaScript Essentials 1 and 2, HTML, CSS; Python Essentials 1 and 2, Python Professional (Cisco Networking Academy)
- Introduction to Soft Skills, TCS iON
